basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camellias, Rhododendrons, Banana plants, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in plants and quarts, and garden requisites. Such plants as these must be shipped without the root being disturbed if one must expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and Ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size shrubs, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far-away sections of our country with the soil removed and transplanted safely. This offer or special inducement is, therefore, made mainly to secure orders from these far-away points where express charges are high and form a barrier to ordering. PLEASE READ CAREFULLY the paragraph on reverse side of this sheet relative to methods of shipping plants. Notice also our guarantee which we place on every order that we ship no matter when it leaves our establishment.

WE GUARANTEE

All Roses, Plants, Shrubs, Bulbs and Seeds that we send out, to be true to name and to reach purchaser in good condition when forwarded by mail or express [freight shipments at purchaser's risk] and we hold ourselves in readiness to replace, free of charge, all stock that may accidentally prove untrue to label, or to refund the amount paid therefor, but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not, in any case, make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with Plants, Bulbs and Seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success, and although we take all possible care to send only such stock as will, under proper conditions, give satisfactory results, we do not, and should not be expected to guarantee the results in any way, nor to entertain complaints that are not made promptly after receipt of goods.

Comparative Value of Roses

Don't
think
any

Rose too small to do well; remember you were small once. There are many sections of our country where Roses do perfectly well and where the one-year plants will make strong bushes in a summer, flowering continually throughout the season. The roots of the one-year plants being carefully protected in pots, permits of the shipping and successful planting of them anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for better effect and more bloom, then Roses of the two-year size from pots are to be recommended. These are, of course, much larger and heavier than one-year size and must, of course, be considered better for planting in beds and borders and in filling out landscape effects. Roses of this size bloom early in the season and give excellent satisfaction in every way. They, of course, cost considerably more than the one-year plants, but are generally preferred and considered worth the difference in price.

Advantage of Pot-Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. This cannot be said of home grown field Roses or imported or grafted Roses. Such plants must be planted before they start into growth and the planting time is exceedingly short, and with these the best results can only be obtained when handled by an experienced Rosarian. With pot-grown Roses it is different. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger size pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. This kind of a Rose, being in a growing condition can be planted at any time through the growing season, and in this has many advantages.

Have your Roses on hand after all danger of frost has passed, and prepare the planting ground, which should be in a sunny location and apart from trees, overhanging buildings, shady locations, etc., by digging and working it as thoroughly as possible, same as for other plants. If possible, choose a cloudy day for planting, and do not allow roots to become dry. Make a hole large enough to admit the plant with the roots spread out in their natural position; then cover carefully, and press the soil firmly down and bring the roots in contact with the soil; then pour in water enough to wet the roots thoroughly, add more earth to fill the hole, and tread firmly down with the foot.

Remember there is much in common between animal and plant life, both demanding for their perfect development a sufficiency of nourishing food and drink, a temperature as equable as possible and thorough cleanliness. A careful observance of this law is bound to bring success.

Roses on Their Own Roots

For the
average
amateur

Not Grafted

Rose planter, we cannot too strongly recommend the desirability of own-root plants. It is generally conceded now by all Rose growers that they are far preferable to budded Roses and much more satisfactory in every way. The Garden Roses of today are mostly the compounds of many types and species, and it is a fact that upon some varieties the foliage is so similar to that of the wild root growth that it is not readily detected by those who are not professional Rose growers. In consequence, everything gives way to suckers and sprouts of wild Roses. Own root pot-grown Roses never produce wild

Roses on Their Own Roots

Roses—
impos-
sible to

(Continued)

produce anything but the genuine variety. The most prominent Rose growers of today are growing Roses on their own roots, fully recognizing their superiority for the garden and the lawn. Very often it happens that the shoot of the variety budded onto the wild root will be broken off in packing or after planting or for some reason dies down; the plant is then entirely worthless. With an "own root" Rose you may break it or cut it back clear down to the roots without harm, as in sprouting from the roots the genuine variety only will be produced. In cold sections tender sorts often winter-kill from the top down to the roots; a budded plant in such a case is thereafter worthless, but not so with an own-root one. Many of the budded plants are so ungainly, crooked and scraggly that shapely plants cannot be made out of them, and in consequence they are totally unfit for the lawn and garden. Nearly all budded Roses are grown on the wild Manetti Rose stock. It is natural for this stock to go dormant or partially so during the winter, and therefore when an ever-blooming variety is budded on this stock it is bound to impair the blooming quality of the plant for quite a portion of the year. A rose grown on its own roots—very naturally the roots and top will work in unison. This is an important point. It follows, therefore, that only professional gardeners, who thoroughly understand the science of budding and the growing of budded Roses should ever undertake the planting of budded Roses.

Garden by McGregor's Guide

In the cultivation of Roses and other plants, there are many points on which the average amateur plant grower wishes information, and to supply this want we have published a revised edition of McGregor's Guide to Floriculture, supplementing it with many planting tables and making it a book which will make a standard work of reference. The different subjects treated are:

Soil and Its Preparation, Treatment of Plants when received, Potting of Plants, Watering of Plants Indoors and Out, Plants in the House in Winter, Propagating, Temperature, How, When and Where to Plant, Window Boxes, Hotbeds, Cold-frames, Pits, Sowing Seed, etc., Fertilizers and Manures, Diseases of Plants, Insects, Protection During Winter.

It is centrally located geographically, with five express companies—American, Adams, United States, Wells Fargo and Pacific, and has unequalled facilities for receiving and shipping orders and procuring the lowest rates to all parts of the country.

Plants Can be Sent Safely at

We send
orders
nearly

Any Time

every day in the year—winter and spring and summer—and if we send your order you are protected against any loss in transit by our guarantee, given on page one and on back of order sheet. All orders filled as soon as possible after receipt. Please allow a reasonable time for the execution of your order. We generally ship the day of or the day after receipt, but during the busy season orders are sometimes delayed a few days. Should you write us concerning the order, give date mailed, amount of order and remittance, and if not shipped this will enable us to locate it promptly. If you wish your order held, do not fail to write it plainly across face of order sheet.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS—Continued

When You Order

Please use the printed envelope and order sheet herewith. Others will be sent you upon request. Always write your name the same, adding the postoffice, county and state on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

Order Early

It will greatly facilitate shipments if orders are sent in early. We aim to forward all orders the same or next day after receipt, but during the busy season it is nearly impossible, hence the advisability of ordering early.

Orders are Promptly Filled

or our customers advised by postal card. If you do not hear from your order within a reasonable time, please mail us a duplicate for tracing, stating exact date of original order, amount of money mailed, form of remittance, exact copy of order, also our order number if we have mailed you an acceptance, with your name and full mail address.

If You Wish Orders Held

Please say so, then we can book your order (and set items aside for you if necessary) until proper time to ship; otherwise we will send at once or acknowledge their receipt. We work extra forces when necessary, and always try to ship promptly.

Remittance With Order

Please send money with your order sufficient to cover the entire bill, as it will facilitate the execution of your order. During the busy season to make out bills for customers, charge, and in a few days receive the money, make the proper credit and send receipt requires more work than we can readily perform, and if remittance in any case does not accompany the order it should have certified references with it. We must not be expected to send goods C. O. D. unless one-third of the amount is sent with the order to guarantee acceptance.

How to Remit

Postoffice Orders—The safest and most convenient way of transmitting money from one point to another is by means of postoffice orders. If these are lost a duplicate can easily be obtained, and there is no danger of their being stolen, for no one can obtain money on them except the person to whom they are addressed. They can be obtained at most postoffices, but not all. The fee is but five cents for \$5.00 and under.

While we assume the risk of paper money enclosed and carefully sealed in our self-addressed envelopes, silver money, except in registered letters, is at the risk of the sender.

Our Prices

We will compare favorably, with those of any responsible firm in the United States. We guarantee our goods to give satisfaction and every shipment is sent out under our guarantee of safe delivery at your door.

Postage Stamps

These can be sent for fractional parts of one dollar or where postoffice orders cannot be had, extra is sent with every remittance. None but stamps in perfect order accepted.

Our Nursery Department

is separate and distinct from our greenhouse, and it is necessary, therefore, that all items selected from this department, and from pages 109 to 111 inclusive, be shipped direct from our Nursery under separate transportation charges.

IF So Instructed We Will Send **\$3 00 Orders** or Larger by Express **Prepaid** Provided We Are Allowed

To remove the soil, or ball of earth, from the roots of the plants. This places the shipping of the plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camellias, Rhododendrons, Banana Plants, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Such plants as these must be shipped without the root being disturbed if one must expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size Shrubs, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far-away sections of our country with the soil removed and transplanted safely. This offer or special inducement is, therefore, made mainly to

secure orders from these far-away points where express charges are high and form a barrier to ordering. **Please read carefully** the paragraph on reverse side of this sheet relative to methods of shipping plants. Notice also our guarantee which we place on every order that we ship, no matter when it leaves our establishment.

Special Express Rates from

Springfield

By reason of all Express Companies having offices at Springfield and through special arrangements made with all Companies, shipments to our customers are carried at a special rate. On account of a graduated scale of rates, the reduction runs from 20 to 33 1/3 per cent less than for regular merchandise. As this is the largest shipping point for plants in the United States, and, as all offices are sending out plants every day in the year, the charge being regulated at the office here, you are insured of special rates from Springfield.

Plants by Mail

All stock listed in our Catalogue, unless noted, is offered at prices marked, by mail, postpaid, and we deliver all such items free of all expense to any postoffice in the United States.

Premiums

Our terms being Cash with the order enables us to give additional plants on orders amounting to \$1.00 or more in the following proportions:

On \$1.00 worth of goods bought at single rates, select to the value of.....	\$.20 extra
2.00	These premiums cannot be allowed
3.00	on Special Offers, Collections or
4.00	goods bought at dozen rate or Seeds
5.00	in bulk or on Nursery Department..
	1.00 extra

The above additional premiums will be allowed on mail and express orders alike.

Lost or Unsigned Orders

Letters are often sent us unsigned and letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent and sign the name and address the same as in the first order, so that it may have immediate attention.

Correspondence

We invite correspondence on any business topic, and are always glad to give you any information and suggestions on any subject within our knowledge. When writing about plants on an order, write on the order sheet, under the heading "Remarks," and when making an inquiry concerning plants not ordered, use a separate sheet, as our order and correspondence departments are conducted separately. When writing about an order, be sure and furnish complete information, so that it will not be necessary for us to look up records, as this always causes delays.

Our Fall Catalogue

of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and will be sent to all our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

Errors and Complaints

We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in some way damaged or not satisfactory, we wish to be promptly notified of the fact, and will make such an adjustment of your claim as will be satisfactory. When you write us, simply give the nature of your complaint, giving a list of the plants damaged and price paid for them, and state whether you wish these items replaced or the amount refunded. It is nearly impossible to find time in the busy season to adjust your complaints promptly unless you give us all the information required to do so in your first letter.

Foreign Orders

10 per cent. extra should be added to all Foreign Orders for Roses, Plants, Bulbs, Seeds, etc., that go outside of the U. S. A. or its possessions. This additional amount is needed to cover cost of extra postage and packing on long distance shipments. Payments are preferred by Money Orders.

Many countries receive goods through Parcel Post from U. S. A. and most postoffices throughout Mexico receive packages by mail up to and including 11 pounds each in weight. This gives customers in Mexico a decided advantage in the receiving of plants by mail, where orders are for plants that will permit of their being sent in this way.

THE FAMOUS ROSE— KILLARNEY

See illustration in colors on front of cover.

In this grand variety we have the masterpiece of perfection in a rose. In size, we have the largest variety; in shape, it is perfect, and in form, probably the most beautiful of any of the Roses grown.

Not for many years has a Rose created the sensation among Rose growers and flower lovers as has this superb variety.

The Killarney originated with one of the most famous English Rose growers of Ireland. It came to us most highly recommended, and has not failed in the slightest. The Killarney is strong and upright. Deep, bronzy, green foliage. It is the color of the Killarney that gives it its popularity. Being of a sparkling, brilliant, light cerise, makes it a flower that stands out by the best.

The Killarney has a wonderful, long perfect pointed bud with grand petals, although not too full to retain its form for considerable time. Seen in the bud, in half expanded bloom, it is most delightful. It is in flower throughout the whole season, most sweetly scented and for bedding and cut flowers will prove one of the most popular that has been given to flower lovers for many years.

Our illustration on the cover was drawn by one of the best artists in this country, and represents this wonderful Rose as near as the artist's skill can give it.

Prices, strong, one-year plant on own roots, 20 cents each. Will bloom the first season. 3 for 50 cents. 6 for 90 cents. 12 for \$1.50, postpaid. Stronger plants, 25 cents each; 3 for 70 cents; 6 for \$1.25; 12 for \$2.25, postpaid. Two year plants, 35 cents each; 3 for \$1.00; 6 for 1.75; 12 for 3.00. Extra large, pot grown plants for immediate blooming, at 50c, 75c and \$1.00 each.

The National Trio of Roses

The Red, White and Blue Ramblers

Scientific Hybridization has produced, through methods past the understanding of the average worker among flowerers, a new rose which can easily be said to be the most novel creation of the century. No one pretends that it is the last word

in the Roses, but it may be fairly described as an epoch-making variety for no variety approaches it; it is a new freak among Roses, and quite distinct.

Read what Mr. McCain, of Dayton, Ohio, says about the New Rose:

The new Rose Veilchenblau will undoubtedly create a sensation. The flowers I saw when at Springfield were decidedly pretty and a distinct novelty. I congratulate you on your introduction of this Rose. F. W. MCCAIN, Dayton, Ohio.

The National Colors in Roses

The Popular Crimson Rambler

The plant is, of a very vigorous growth, making shoots from eight to ten feet during the season. It is also magnificent in bush form; color is the brightest crimson. The flowers are produced in great pyramidal panicles, the individual flowers measuring about one to one and one-half inches in diameter. The foliage is a bright green and glossy, and contrasts finely with the bright crimson of the flowers. **Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; two-year-old plants, 25 cents each; \$2.00 per dozen; large three-year-old plants, field grown, with canes three to five feet, 50 cents each, by express only; six for \$2.50; \$4.50 per dozen.**

The Beautiful New White Rambler

Of German origin, and in habit of growth, foliage, manner of blooming, form of flowers and hardness identical with Crimson Rambler. Flowers are pure snow-white and sweetly scented. **Price, 15 cents each; four for 50 cents; \$1.35 per dozen, postpaid; strong two-year-old plants, 30 cents each; three for 85 cents; \$2.25 per dozen, postpaid.**

The Blue Rambler. VEILCHENBLAU (Violet Blue)

The new rambler "Veilchenblau" (Violet Blue), which is hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler. The blossoms, massed in large umbels, are semi-double, of medium size. The color, on first unfolding, is either reddish pink or purplish pink, then turns amethyst, and finally steel blue as the flower fades. The general color impression is that of the March violet. The yellow stamens appear in sharp contrast to the blue petals. **Price, strong one-year plants, 15 cents each; stronger plants 25 cents; two-year plants, 50 cents; extra large 75 cents.**

A New Combination of Color in Roses

The introduction of Veilchenblau makes it possible to produce effect which have never before been possible. Combined with its parent, the popular Crimson Rambler, which we offer in **strong one-year plants at 15 cents each; its worthy companion, the White Rambler, strong one-year plants at 15 cents; the Red, White and Blue Trio for 50 cents, postpaid (the Trio in two-year plants for \$1.25, postpaid), will produce an effect heretofore unattainable.**

EVERBLOOMING CRIMSON RAMBLER—For years the ambition of every Rose-grower has been to produce an ever-blooming type of the famous Crimson Rambler. This has been accomplished in this variety—a sport or offspring of the popular Crimson Rambler. It surpasses any other Rose for brilliancy of display. Blooms from early spring until well along in the autumn, bearing freely large, brilliant, crimson clusters of flowers. It has the additional advantage of blooming profusely on the young wood in one-year-old plants. Our stock comes direct from the introducer. **Strong young plants, 25 cents each; strong two-year-old plants, 60 cents each.**

THE QUEEN OF ALL FLOWERS The Garden Rose

The name is an inspiration to all garden lovers. Roses are justly classed among the showiest and best plants for decorating the home grounds. We endeavor in this catalogue to present the merits of each variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics and recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which therefore require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon them. Our immense stock and great variety of Roses enable us to offer assortments adapted to various purposes; and whenever we can be of any assistance in making selections, our services will be cheerfully given.

THE AMERICAN BEAUTY

THE GREATEST OF THEM ALL

A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals take the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid value as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as to being true to name.

Price, strong plants, one-year, 20 cents each, three for 50 cents, postpaid; two-year, 35 cents each, three for 95 cents, postpaid; three-year, 50 cents each, three for \$1.25 (by express); three-year (extra heavy plants), 75 cents each, three for \$2.00 (by express each, three for \$2.00 (by express).

THE MOST DESIRABLE

NEW ROSES OF 1911

SOME OF THE BEST INTRODUCTIONS OF VARIOUS PROMINENT EUROPEAN AND AMERICAN ROSE SPECIALISTS

The best bloomers for the yard and garden are included in these newer Roses of all kinds. Those offered are of unusual value, most of them having been selected while growing and blooming in Europe the past season. Just as Rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. The number of new varieties of Roses introduced from all parts of the world will average about one hundred per year. After a thorough test, usually from five to ten sorts each year will come up to the mark as being worthy of cultivation. The Roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties; and though, as with all Roses, some are of growth and habit such as to make them adapted to certain sections of the country, generally speaking all will be found highly desirable.

The Five Grand Cochet Roses

If you want five of the finest hardy-blooming Roses for outdoor cultivation, varieties that will produce hundreds of superb flowers throughout the growing season, order the five COCHET ROSES. No matter where you live, they will give you perfect satisfaction.

(1) Crimson Maman Cochet

Etoile de France

This rose has been named descriptively Crimson Maman Cochet, because of its vigor of growth, stiff stems, heavy foliage, freedom of bloom and its hardiness fully entitle it to become a member of the Cochet family. It is as free flowering as any Tea or Polyantha Rose, bearing its massive, large, full, cup-formed flowers singly, on long, stiff stems; the color is new, clear, red crimson velvet, brightening in the center; the flowers are the most splendid substance, and exquisitely fragrant. **Price, strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.**

(3) Pink Maman Cochet

(The Queen of all Pink Garden Roses)

Such beauty and exquisite form as is possessed by this variety is well nigh marvelous. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and one-half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Perfectly hardy in all sections of the country. The color is clear, rich pink, changing to silvery-rose. **Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.**

(4) Red Maman Cochet

Helen Gould

Grows in almost any soil or situation, and produces its superb flowers in amazing profusion on long, strong shoots. For vigorous growth and freedom of bloom, better than American Beauty, and without a peer. The flowers are full and perfectly double, the buds beautifully made, long and pointed. Color warm rosy-crimson. Hardy everywhere. **Price, strong one-year plants, 15 cents each; four for 50 cents; \$1.25 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.**

(5) White Maman Cochet

This most superb variety is identical with its parent Maman Cochet, except in color, which is snowy-white, sometimes faintly tinged with the slightest suggestion of pale blush. With the same freedom of bloom, magnificent form of buds and flowers, and hardiness, it stands at the head of the list as the best White Rose for open-ground culture. It has the vigor of an oak, being hardy everywhere. **Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.**

(2) Yellow Maman Cochet

Our Grand New Rose

This variety is absolutely the best hardy ever-blooming yellow Rose in existence. In the open ground, it is superb—a typical Cochet Rose, with its gracefully molded buds, magnificent open flowers, stiff, strong stems, heavy foliage, and with the vigor of growth and blooming capacity that has made the Cochet Rose the best of their class and color. **Price, strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35c each; six for \$1.75; \$3.00 per dozen.**

The "Hermosa" Collection
Continuous Bloomers
Always in Flower, Hardy
The full collection, one
year plants..... **60^c**

The Five Grand Hermosa Roses

The Hermosa Roses are exceptionally fine for bedding, growing very vigorously and blooming very freely. We offer five of the Hermosa type of Roses. If you want to have rosebuds to cut all summer, this set will give you an abundance of flowers.

The Old Ever-Blooming Rose

Hermosa

We believe the Hermosa is the best known in the entire rose family and a universal favorite. Hardy as a lilac bush and as free-flowering as the Geranium; it combines everything most desirable in a rose. The flower is cupped, finely formed and full, color most pleasing shade of pink, soft but deep, very fragrant. **Price, 15 cents each; large plants, 30 cents each.**

The White Hermosa

Marie Lambert

This is a lovely white rose, a pure Tea, but a foreign seedling; the freest flowering white rose we have seen. It will be especially useful in set designs. For a pot plant it cannot be excelled, as it possesses every good quality of a pot-rose. We counted on one plant 143 buds and flowers in a single day, and the plant was only nine months old. Try it. **Price, 10 cents each; large plants, 25 cents each.**

Yellow Hermosa Rose

Coquette de Lyon

No rose like it for freedom of bloom. The plant is a fine grower and carries numbers of flowers on every shoot. A fine yellow rose, large, not at all formal, but very attractive. Called the Yellow Hermosa from its free-flowering character. We do not know of any rose that will give the satisfaction that this variety will and we heartily recommend it. **Price, 15 cents each; large plants, 30 cents each.**

The Beautiful Red Hermosa

The flowers of this variety are the richest red of any rose in our vast collection; a single bud or blossom will catch the eye at a great distance, so brilliant is the color. Indeed, it is unmatched in its velvety richness; could well be termed "The Velvet Rose." It is as free in blooming as Bon Silene. One of our customers in California writes that she is kept busy by people asking her what rose this is. **Price, 15c each; large two-year-old plants, 30c.**

The Premier Bedding Rose

Queen's Scarlet

This is, without doubt, the very best of all red roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery-scarlet, a color seldom seen in roses. Indeed, a bed of this rose produces a mass of red equal to a bed of Geraniums. It is planted everywhere on account of its color and freedom of bloom. None better. Try it. **Price, 10 cents each; large two-year-old plants, 25 cents each.**

SPECIAL OFFER No. 225—One each of the five Hermosa Roses, postpaid, for 60 cents; two-year plants, one each of the five Hermosa Roses for \$1.25.

The Rose of Many Colors,
Helena Cambier

THE ROSE OF MANY COLORS HELENA CAMBIER

It is a new Rose of French origin, destined, we believe, to find a prominent place among the highest grade ever-blooming Roses, both for summer and winter blooming. The growth is free and vigorous, very free-blooming, flowers of splendid substance and a delightful shade of deep, rich golden-yellow. In extreme heat comes a deep amber color. The buds are full and firm, lasting a long time when cut. As the flowers expand, the center of the Rose discloses depths of golden-yellow, with light orange tints, while the older petals lessen to lemon-yellow, giving a combination of tints and tones unequalled in their beauty. **Price, 20 cents each; two-year-old, 35 cents each.**

Climbing Clothilde Soupert

Hardy Ever-Blooming Climbing Rose

The new climbing Clothilde Soupert stands at the head of hardy climbing ever-blooming Roses, and is unequalled for quick and abundant bloom and healthy, vigorous growth. The flowers are two and one-half to three inches across, and perfectly double; rich creamy-white, sometimes tinted with blush and borne in immense profusion, the whole growing season, from June to November; handsome glossy green foliage, not subject to insects or disease, and is altogether one of the most beautiful and satisfactory hardy ever-blooming climbing Roses for porch or trellis yet produced. **Price, 15 cents each; two-year-old plants, 35 cents each.**

The Red, White and Yellow Marechal Niel Roses

(1) YELLOW MARECHAL NIEL

A Rose so famous as to really require no description. Its magnificent golden-yellow buds are worn the world over and are almost massive in dimensions. The reports from Southern growers tell of single plants showing one and two thousand blooms of Marechal Niel at one time. This Rose starts rather slowly, and for that reason the best success will be had with the stronger plants. **Price, 15 cents each; stronger plants, 25 cents and 50 cents, 75 cents and \$1.00 according to size.**

(2) **WHITE MARECHAL NIEL**—A sport from the world-famous Marechal Niel. A fine grower, and produces its lemon-white flowers in even greater profusion. Is strongly tea

scented and fine for arbor training. **Young plants, 15 cents each; two-year plants, 35 cents each, three for \$1.00.**

(3) **RED MARECHAL NIEL**—A cross between General Jacqueminot and Marechal Niel. Flowers very large, well shaped, full; form of buds and flowers like the yellow Niel; color bright red, shading to a deep rose; very sweet; growth very strong. **Price, 15 cents each; three for 40 cents; two-year plants, 35 cents each; three for \$1.00.**

SPECIAL OFFER No. 235—The Three Marechal Niel Roses, Red, White and Yellow, in strong one-year plants, for 40 cents, postpaid; strong two-year plants, the three for 85 cents, postpaid.

THE LARGE SIZE plants referred to above are the two-year plants. We also give prices on one-year plants, which, however, are not little, weak, forced slips, but the product of years of experience and our improved methods of culture, which insures the greatest vitality and abundance of bloom.

McGREGOR'S NEW FANCY ROSES

An Incomparable Collection
of Exhibition Varieties

Notwithstanding the great number of varieties of roses already introduced, hybridization has, during the last few years been more carefully studied than ever before and the results enable us to offer a collection of fancy roses which will stand without equal. The average garden enthusiast nurses the delusion that roses run pretty much alike in color while the fact is that it is not difficult to make up the most attractive collection and from which the common rose color would be entirely excluded. It is the color of a rose that makes its appeal universal, even fragrance is placed to one side and the form is of secondary importance. The roses of this collection are celebrated for their extreme delicacy of coloring and delicious fragrance. As supplying the various shades of yellow wanting among roses of the past, they will be found particularly attractive, while for growing in the yard and garden they will be found of unusual merit, and their hardiness and vigor will lead to extended culture. Lovers of roses should give special attention to this new class and place their orders early in the season, for the charm of the new and distinct rose is to have it while it is new.

CHRYSANTHEMUMS

Chrysanthemums are of Japanese and Chinese origin, and are by far the most gorgeous and elegant of our fall blooming plants. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unquestioned title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, ease of culture and certainty to flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know, whether other plants bloom or not, the Chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

The varieties offered below are the very latest and best introductions. They are selected from the prize winners of the late exhibitions and they will win cups anywhere.

Intensity

The flowers are of massive size, reflexed, with broad, stiff petals; color deep, rich, velvety-crimson, with no shade of brown or chestnut. Flowers borne on strong, stiff stems. They grow close up to the flowers, which gives the plant an elegant appearance. Price, 25 cents each; three for 60 cents.

Lynnwood Hall

A glorious new Chrysanthemum, glistening snow-white, of the largest size, perfectly incurved, of elegant finish, and with stiff stems and beautiful foliage. Price, 20 cents each; six for \$1.00; \$1.75 per dozen, postpaid.

A. J. Balfour

Golden Eagle

A new variety which will prove one of the most valuable yellow Chrysanthemums ever introduced. It will prove as great a favorite as the grand yellow Major Bonaffon. This sort has been fairly tested this year, and at the Chrysanthemum shows the large vases of it are attracting unusual attention. The color is a deep yellow, flower of compact, incurved form, with a strong stem holding the flower quite erect. The foliage grows well up to the flower. This variety was awarded the sweepstake prize at the Chicago Chrysanthemum Show. Price, 20 cents each; three for 50 cents; \$1.75 per dozen, postpaid.

Louis Boehmer

(Pink Ostrich Plume.) Louis Boehmer has the same wonderful hair-like growth or excrescence that appeared for the first time in the white variety Mrs. Alpheus Hardy, but it differs from it in color, having a most beautiful shade of lavender-pink, shaded with silvery-pink on the ends of the petals. Price, 15c each; three for 40c.

EARLY FLOWERING

The Chrysanthemum is of easy culture, but to secure fine blooms and strong plants, care and attention while the plants are growing must be given. There is probably no plant cultivated for its flowers, which is capable of greater possibilities, and year after year the blooms are becoming finer, better in color, size, form and in every way, showing that the time and study which is being given to them is not in vain. (See bottom page 36.)

Growing Chrysanthemums for Large Flowers

To bed out Chrysanthemums with the purpose of having them bloom out of doors, procure good, strong young plants in the spring. As soon as danger of frost is over, plant the Chrysanthemums out in a bed, in good, rich soil, in a well drained location. When the plants get to be eight or ten inches high, nip out the tops to make them branch. When branches start out well from the top, and are several inches long, nip the tops of them also, in order to induce more branches. This should not be continued later than the 1st of August, as, in about a month from that time, they will begin to make buds. When the buds appear, if large flowers are wanted, allow only one, the center bud, to remain on each branch, but if quantity is wanted and not quality, they may all remain, but the flowers will be much smaller. As soon as it is time for frost, the plants should be protected at night to keep them from being touched. The subject is fully treated in McGregor's Guide to Floriculture.

BEAUTIFUL DECORATIVE FERNS (THE BEST FOR HOME AND PORCH DECORATIONS)

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed.

The Popular Boston Fern

The Boston Fern (Nephrolepis Exaltata Bostoniensis)

This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents each.

New Plumed Fern (Elegantissima, or Tarrytown)

This is a sport from the Pierson Fern; the plant is of much more compact habit, one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 15c each; larger plants, 25 and 50 cents each, postpaid.

The New Crested Fern (Nephrolepis Superbissima)

The latest improvement in this family of Ferns, unique in foliage, quite different from all other varieties of this family, standing in a class by itself. It makes a dwarf, compact growth similar to the Scotti Fern, the fronds, however, being more dense, firm and rigid, and the foliage several shades darker than any other Fern coming from the Boston type. Price, nice young plants, 35c each; strong plants in 4-inch pots, well established, 75 cents each.

Hardy Fern

The Springfield Fern

Offered for the first time. A valuable Fern, especially for vases, baskets, and box work of very erect growth, the fronds more stiff than the Boston, and similar to the Piersonii Fern. It is a vigorous growing variety and we believe will prove very popular. Price, nice young plants, 15 cents each; strong plants, 35 and 50 cents.

Nephrolepis Piersonii

An entirely new form of Boston Fern. The pinnae subdividing making miniature fronds which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful, feathery, plummy, nothing describes them better than "Ostrich Plumes." Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents.

Nephrolepis Superbissima

SPECIAL OFFER No. 376—Your selection of Ferns from this page, excepting Hardy Ferns, to the value of \$1.25 for 95 cents, postpaid.

Hardy Ferns

These graceful and universally popular plants are of easy culture, and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location. Many places more or less shut out from the sunlight may be converted into veritable beauty spots by clumps of Ferns of various kinds. Price, 25 cents each; \$2.75 per dozen, by express only.

Ostrich Plume Fern

Ostrich Plume Fern (Nephrolepis Whitmanii)

The best of the Crested Ferns and a great favorite. (See cut.) Delights in hot weather and is perfectly at home here in the summer. Whitmanii is of dwarfier growth, but equalizes matters by compactness and a wide, stockier shape. Price, nice young plants, 15c each; larger plants, 25 and 50c each, postpaid.

The Plumed Scotti Fern (Nephrolepis Scholzei)

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti possessing all the merits of that most popular variety, but with the pinna sub-divided, giving it an airy feathery appearance. Price, nicely shaped plants, 50 cents each, postpaid.

The Newport Parlor Fern

(Nephrolepis Scotti)

It is a condensed form of the Boston Fern, with characteristics not evident in the parent, an average plant in an eight-inch pot having 200 fronds. The fronds average about twenty inches in length and three inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.

The Newport Parlor Fern (Nephrolepis Scotti)

The Beautiful Gold Fern of Australia

(*Gymnogramma Alstonii*)

This exceedingly novel and beautiful variety bears leaves of a dark green on the upper surfaces, while the under surfaces are richly covered with a deep golden, farinose powder. It is a most striking plant when viewed from beneath, while from above the unfurling young fronds show the rich golden color. Be careful to avoid watering the foliage of this Fern, set the plant in water instead of watering on top. This is quite important in growing this variety. **Price, 20 cents each; three for 50 cents.**

Asparagus Plumosus Nanus (Climbing Lace Fern)

An exceedingly beautiful plant for Fern dishes, the house and conservatory, and will thrive nicely in the temperature of an ordinary living room. Entirely unequaled for the grace and beauty of its lovely, spray-like fronds. **Price, nice, thrifty plants, 15 and 20 cents each; \$1.50 and \$2.00 per dozen, postpaid. Price, larger size, 25 cents each, postpaid; \$3.00 per dozen, by express.**

Pteris Adiantoides (Narrow Leaved Holly Fern)

A very desirable Fern, whether for growing in the room or planting out. Very similar to Falcatum, having the same deep green leaf. Grows very freely and attains a height of 12 to 18 inches. **Price, 15 cents each. Price, larger size, 25 cents each, postpaid.**

Pteris Wimsetti (Crested Fern)

A very pretty and useful Fern for specimen or dish. Green leaves with ends very peculiarly crested. This Fern is not generally known. It is one of our best varieties for dishes, being a short, compact grower, and will stand rough treatment. **Price, 15 cents each; \$1.00 per dozen. Price, larger size, 25 cents each, postpaid.**

Adiantum Venosum (Large Leaved Maiden Hair Fern)

A very beautiful form of A. Cuneatum, having long, graceful fronds, with the ends of the fronds developed into bunching, tasseled heads. Very similar to Cuneatum Grandiceps, only having a little larger leaf, and stronger grower. **Price, 10 cents each; three for 25 cents; larger plants, 25 cents each.**

The Beautiful Maiden Hair Fern

A very beautiful form of A. Cuneatum, having long, graceful fronds, with the ends of the fronds developed into bunching, tasseled heads; a distinct and lovely variety. **Price, 10 cents each; \$1.00 per dozen; larger size, 25 cents each. (See cut.)**

The Beautiful Moss Fern (*Selaginella Emilliana*)

A new, upright-growing moss, with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain twelve to eighteen inches in height. We know of no moss superior to it. We put this moss in with the page of Ferns as the character is very much like the Ferns and is used with them in Ferneries. **Price, 10 cents each; \$1.00 per dozen. Price, larger size, 25 cents each, postpaid.**

Cyrtomium Falcatum (Holly Fern)

We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, yet it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting, on account of their lasting quality. **Price, 15 cents each; \$1.50 per dozen.**

BEAUTIFUL
CHINESE
AZALEA

Chinese Azalea

Asparagus Sprengeri

When introduced, at a high price, this variety was received with some hesitation as to its desirability, but after only a limited trial it has come forward with some prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large Roses, etc., but grown in suspended pots it makes one of the prettiest decorative house plants we know of. Used in decorations, as, for example, in the decorations of mantels, nothing can equal it. It is also a handsome thing for ferneries and hanging baskets. (See illustration.) Price, 10 cents each; 3 for 25 cents; large plants, 25 cents each; three for 60 cents.

Asparagus Sprengeri

Norfolk Island Pine
(Araucaria Excelsa)

As a decorative plant for the house this is one of the handsomest and most serviceable. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequaled in the vegetable kingdom. It is easily grown in the house and is highly ornamental. Our importation of these this year was exceptionally large and fine selected stock, especially in the medium size, for which there is always a demand. Price, nice plants, 12 to 15 inches high, 3 tiers, \$1.00 each; larger plants, 18 to 20 inches high, 4 and 5 tiers, \$1.50 each.

Norfolk Island Pine
(Araucaria Excelsa)

Azalea

Chinese Azalea Indica

No plant yet introduced gives better satisfaction or is becoming more popular every season for window and conservatory decoration. The ease with which they can be grown, their diversity of color and freedom of flowering will always keep them in public favor. The accompanying illustration gives a good idea of an average plant in flower. We offer only large plants, well shaped and covered with buds, which can only be sent by express (too large to send by mail.) Price, specimen plants, \$1.00 and \$1.50 each.

Azalea Mollis

The Hardy Azalea

See under shrubs, pages 73 to 76 inclusive.

Ageratums

Price, 10 cents each; any three for 25 cents.

LITTLE BLUE STAR—Five inches high, bears clusters of small blue flowers.

PRINCESS PAULINE—Both colors, blue and white, are combined in the same flower; the body of the flower being white.

STELLA GURNEY—Dwarf and compact growth; fine for bedding or basket and vase; color is a deep, even blue.

COPE'S PET—New dwarf variety; bright blue flowers.

DWARF GEM—The best white variety ever introduced.

VARIEGATUM—Beautiful variegated leaves.

TAPIS BLUE—This is the best blue Agaretum for bedding.

Asparagus Plumosus Nanus

One of the handsomest of our foliage plants. The leaves are a bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality, when cut, is remarkable, retaining their freshness for weeks, hence it ranks as the most valuable plant we have for this purpose, surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. It is one of the finest decorative vines recently introduced; by many florists it is used instead of smilax; as easily grown and very much more beautiful on account of its light feathery growth.

Price, nice plants, 15 cents each; two for 25 cents; large plants, 25 cents each; 3 for 60 cents.

Sanseveria Zealanica

A New Decorative Plant of Great Value

There is scarcely a decorative plant listed that is more striking in foliage and habit than this, and certainly none other that stand as much downright neglect and hardship as well as this. Nothing but frost or continued drenching with water has terrors for it. It will grow in a dark hall, a cool bedroom, or stand on the mantel in a heated sitting room. It will stand gas and dust, and will go for months without a drop of water, yet remain as thrifty as ever. Singularly beautiful, as well as easily grown. Erect, rigid, sword-like leaves, in some old specimens reaching a length of from four to six feet. The leaves are thick and fleshy, a dark-green color with clouded bars of white. Price, 15c each; larger size, 25c.

We have used the greatest care in obtaining our Flower Seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering the seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

Novelties and Specialties for 1911

Our Colored Plate Specialties

McGREGOR'S GIANT MAXIMA PANSIES

(Illustrated in Colors on Opposite Page)

Our colored illustration but feebly expresses the wonderful beauty of this mixture of Pansies. The illustration is only two-thirds natural size and not nearly so brilliant as the real flowers. The blooms are all of giant size, exquisitely tinted, delicately veined, and richly blotched and shaded. Only a very small number of the varieties in this mixture are shown in the colored plate, for in a bed of a hundred or more plants it would be hard to find two producing blooms alike. The seed is procured from the best European as well as American growers, and is fresh and sure to produce healthy plants. Each packet of the Maxima Mixture contains five hundred seeds. No garden is complete without Pansies, and nothing can be more attractive than a bed or border of McGregor's Giant Maxima Pansies. **Price, 25 cents per packet.**

MASTERPIECE, GIANT FRILLED PANSIES—(See colored plate). A remarkable type having curled or frilled petals, giving the flower the appearance of being double. The colors are rich and brilliant including many new and attractive shades. **Price, 20 cents per packet.**

GIANT PARISIAN STAINED PANSIES—(See colored plate). Very large sized flowers, of many fancy colors; blotched, striped and variegated in an exquisite manner. Strikingly handsome. **Price, 20 cents per packet.**

MADAME PERRET, GIANT PINK AND CRIMSON PANSIES—(See colored plate). A new and beautiful strain of pansies producing large flowers of most beautiful shade combinations of wine red, crimson, rose and pink. **Price, 15 cents per packet.**

SPECIAL OFFER—One Extra large packet of each, Maxima Pansies and Excelsior Asters for 50 cents (as illustrated in colors opposite).

McGREGOR'S EXCELSIOR ASTERS

(Colored Illustrations on Opposite Page)

On our colored plate opposite there is room for only a very few of the varieties included in our Excelsior mixture of Aster seed. Only the finest varieties of the newer kinds, dwarf and tall, branching, early, mid-season and late, are used to make up this superior mixture. It includes the greatest variety of shades from darkest violet and crimson to most delicate pink, lavender, yellow, salmon, and purest white. Also all shapes, embracing the immense flat feathery blooms of the Ostrich plume types, the quilled and twisted cactus flowered, and the symmetrical globe shape of other varieties. A bed of these mixed Excelsior Asters will be in bloom from July to October. Every packet contains over three hundred seeds. No annual is more satisfactory than Asters or more easily cultivated. **McGregor's Excelsior Mixed Asters. Price, 25 cents per packet.**

BEAUTIFY YOUR LAWN WITH MCGREGOR'S LAWN GRASS AND CLOVER SEED

McGregor's Special Mixture for the Lawn

This mixture will produce a thick, good sod in a very short time. Price, 30 cents per quart, postpaid; 20 cents per quart by express.

"Shady Nook" Lawn Grass

As this mixture is composed entirely of choice clean seed of the finest and most costly grasses, it cannot be sold at so moderate a price as our regular lawn mixture. The best mixture obtainable for shady places. Price, 45 cents per quart by mail, postpaid; 35 cents per quart by express.

White Clover

White Clover is an excellent addition to lawn grass seed, and should be sown with it wherever a quick, short growth is needed; holds green, and does not burn out so readily as grass. Price, 40 cents per pint, postpaid; 60 cents per quart by express.

Our Lawn Grass Seed is very heavy, as there is no chaff in it, only solid seed, and it can be sown more sparingly than the ordinary grass seed sold, as it is all seed.

NURSERY DEPARTMENT CHOICE FRUITS AND FRUIT TREES

Prices on Nursery Stock are placed very low and we cannot allow premiums to be selected on orders for small Fruits or Fruit Trees.

The trees offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received, before they can be planted they may be safely kept a reasonable length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruit early, that they may be planted out before the foliage starts.

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all nursery stock orders be shipped direct from the Nursery.

THE FINEST VARIETIES OF STRAWBERRIES

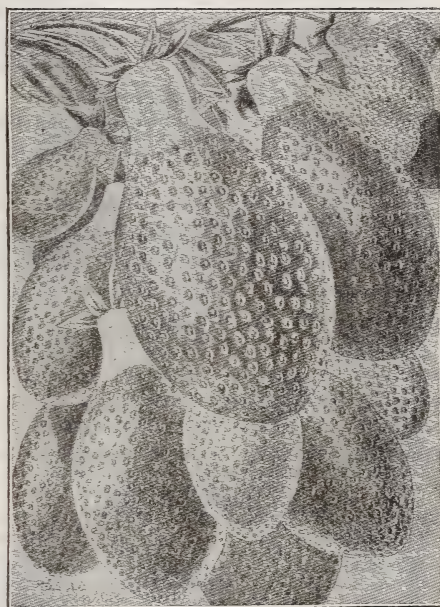

All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens and are termed pistillate or imperfect flowering varieties and must be planted near some perfect-flowering sort or they will produce little or no fruit. We advise fall planting for the best results. **Dip the roots of the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out.** Do not wet the tops or you will rot the plants. Neglect for an hour or so is often fatal.

The Greatest Strawberry of the Age. Nature's Wonderful Gift to Mankind

KEVITT'S WONDER NEW CREATION

The most Distinctive and Individual of all AMERICAN Strawberries; unlike any other; this new type has never been dreamed of before; nothing like it has ever been introduced

KEVITT'S WONDER STRAWBERRY (Per.). This berry is absolutely new and distinct from any other Strawberry. It is a perfect blooming variety; berries large, with seeds of bright yellow, making it a perfect beauty. The flavor is fine and the berries are just the right shape and size to make them show up well in the crate, always commanding the top price. The introducer claims they can be safely sent in a common express car from New York to Chicago, and open up in fine shape. This is a very strong point in its favor, as a good shipping berry is very essential for commercial purposes. Fruit stems short and stocky and so full of berries that they are weighted to the ground. Season medium, about same as Glenn Mary. Berries bright red with a long neck, parting readily from the calyx. Very few seeds and sweet as a sugar plum. Every plant grower, every gardener, must have some of these new strawberries. **Price of fine plants, \$1.00 per dozen, postpaid; \$3.00 per 100 by express; \$25.00 per 1,000.**
